Emazinga enzuzo/entalo netindleko tekulima kanye nekutsi Belimi betfu batsintseka njani

i-South African Reserve Bank Monetary Policy Committee (MPC) ikhuphule lizinga lemali yekubolekisa ngemaphesenti langu-50 kuya ku-8.25% ngesikhsatsi semhlangano wayo wenyanga yeNkhwekhwetini bese kutsi lizinga lelisetulu lentalo libe ngu 11,5%, nalokungulokucindzetela tindleko tabo kutsi tibe sesilinganisweni lesisetulu kusukela ngenyanga yeNkhwekhwetini 2009. Labenta inchubomgomo bakhuluma ngekukhatsateka mayelana nekwehla lokukhulu kwemali yelirandi kanye nenchindzetelo yekunyuka kwekukhula

kwemandla emali ngemuva kwekulungiswa kwelinani. Kukhuphuka kwemanani lokwenteka ngemuva nje bekubangelwe nguleluhlelo lekuncanyulwa kwagezi ngenhloso yekonga, kukhuphuka kwemandla emali kanye nekwenyuka kwemanani emhlaba wonkhe. I-SARB iphindze yabuyeketela ngekwehla kwemandla emali yayo, lokwehla kwemandla emali ya-2023 nyalo sekuhlelelwe kutsi kube ngu-6.2%. I-SARB yenyuse lizinga layo lemali lebolekisako ngemaphuzu la-125 kusukela nga-Bhimbidwane 2023.

Ngekusho kwelucwaningo, bosomnotfo balindzele kukhuphuka lokukhulu kwelinani/silinganiso se-repo nga-25 bsp kuya ku-8.5% ngenyanga yeNyoni 2023

INDLELA YEKUSEBENTA KWELIZINGA LE-REPO

I-repo rate linani lemali lekukhwako lapho i- Reserve Bank iboleka emabhange etekuhweba eNingizimu Africa. Emabhange etekutsengisa anika balimi imali lencane ngetindleko letinkhulu kanye nemaphesenti latsi lalingana netingoti temlimi ngamunye. Lizinga lema-repo liyalungiswa kute kugcinwe lizinga lekukhula kwemnotfo lisemkhatsini wemigomo letsite. Lombono we-Reserve Bank wekunyuswa kwelizinga le-repo wentelwe kokutsi kuboleka imali kube matima. Loku kunciphisa linani lemali lengenako emnotfweni, ngako-ke bese kuba kuncane

longasetjentiswa. Uma kusetjentiswa kwemali kwehla, kuba matima kukhuphula intsengo futsi loku kusita kugcina lizinga lekwehla kwemandla emali liphakeme.

Letinye tetati tivete kwekutsi kunekukhuphuka kwemandla emali. Kulabanye balimi labanencenye yemali labangayigcina, kukhuphuka kwelinani le-repo kungaba nemtselela lomuhle ekubuyiselweni kwemali lebayigcinile. Loku kubangelwa kutsi nangabe lizinga lemali lenzalo likhula, nembuyiselo levela kuloko lokugciniwe nayo iyakhula. Nzanobe kunjalo, imali lezuzwa bsalimi labanyenti baseNingizimu Afrika iphansi

lokubangelwa yekubita kwemkhicito. Ngekusho kwebalimi, yonkhe imali labayitfolako ibuyela emuva kulelipulazi kwentela kugcina emazinga lakhona ekukhucita. Loko kufaka ekhatsi kusuka kudizili wekuhambisa umkhicito kuya etincenyeni letitsite, imali lenyenti iya kubasebenti njengobe imali yelihora yenyukile, kufakwa kwamanyolo kubi kakhulu, tindhavu temoba, tindleko tesivumelwano kanye naletinye tindleko tetintfo letisetjentiswako tikhule. Kubese kuba nebulikhuni bekuholela basebenti.

TINDLEKO TONKHE SETIHLANGENE

Njengobe lizinga lekukhula kwemandla emali likhula, kulukhuni kugcina kuloko lokulindlekile, kubuye kube kubi kakhulu uma kunekukhula kwetindleko tekusebenta. Loko lebekucatjangiwe nalokuhlelwe balimi ekucaleni kwalomklamo kumele kubuyeketwe njengoba kungasho lutfo manje ngenca yetingucuko letinkhulu etimalilini. Kunelitsemba lekutsi ngandlela tsite ngalalinye lilanga loku kutawugucuka, kwentele kutsi balimi bakhone kuphila sikhatsi lesidze.

Balimi kumele bakhone kuhambisana netindleko tetintfo letisetjentiswako, ikakhulu uma kungabukwa emandla agezi kanye nesidzingo sekutfo letinye tindlela tekusebentisa emandla kute kugcinwe tekulima. Balimi batfoa bumetima kulokukhula kwetindleko talokungenako. Letibalomletkhishwe yi-Absa tikhomba kutsi balimi bafanele kukhokha 40% ngetulu kwetintfo letisetjentiswako kute kugcinwe emazinga lakhona ekukhucits lesesiwabonile kuleminyaka lembalwa leyengcile.

LOKU KUSHO KUTSINI NGEMALOMBOLEKO YEMKHICITO WETEKULIMA?

Unyaka	Sikweledi semali lesitsetfwe	Emazinga enzalo yemali	Sikhatsi (Iminyaka)	Imbadalo yenyanga	Imali lebuyiselwa ngemnyaka	Linani letidleko selilonkhe
2020	R1 000 000	7,00%	5	R19 801,17	R237 614	R1 188 070
2023	R1 000 000	11,25%	5	R22 118,33	R265 420	R1 327 100

Kuchaza loku ngalokusobala, ngaphambi kwekwenyuswa kwemaphesenti etinzalo, kuniketwa kwemalimboleko yemkhicito lengu-R1 188 070 yeminyaka lengu-5, bekungabita umlimi R1 188 070, abe akhokha R19 801 17 njalo ngenyanga. Ngekulandzela kunyuka kwenzalo kusukela

nga-July 2020 kuya ku-May 2023, leyo mboleko lefanako yekukhucita iba ngu- R1 327 100 (lokwenza umehluko wa-R139 030), lenemali lengu-R22 118 33 lebhadalwa njalo ngenyanga.

LOKULANDZELO NGULOKUFANELE KUTSI UKUNAKE KUTE UNCIPHISE BUNGOTI NYALO NJENGOBE IMALI YENTALO SEYIKHUPHUKILE.

- Ccwalisa timphephsa teluhlolo lwetimali lwebhizinisi yakho yelipulazi kute ubuyekete likhono lekubuyisa imali kanye netilinganiso tekukhokha imali.
- Khulumisana nemboleki wakho mayelana naletibalo kanye neluhlobo lesikweleti semalimboleko yakho.
- Tfola kutsi imali lotayitfolo inenzuzo lengashintji yini nobe leshintjako. Imalimboleko lenentalo legucukako iye yatsintfwa inchubomgomo we-SARB yekwenyusa intalo.
- Yakha luhlelo le-cash flow projection kute ubone kutsi loyitfolile ingatsintseka njani ngewenyuka kwemanani emali yakho.
- Nangabe ema-margins atawuncishiswa, cabanga ngekuhlela kabusha imali yakho loyitfolo ngekusebentisa intalo lebekiwe.
- Ccwalisa luhlobo lokuhlathiya ngalokujulile nekuvisisa kute ubone kutsi tintfo letehlukene letitsengiswayo kanye nekuntjintja kwelinani lenzalo kutawutsintsa kanjani imali yakho.
- Cabangisisa nangetindlela tekutsengisa letahlukene tekutfolo intsengo yemikhiciyo.
- Kubuketa tindleko lekuhlangenwe nato kute kuncishiswe tindleko letingahle tikhule ngenca yekwehlsa kwemandla emali.

Sifinyeto

Akusibo bonkhe ablimi labakhona kubhekana nesimo sekukhuphuka kwelinani lenzalo. Balimi labahlela kutsatsa tikweleti letisha, kuvusetela tikweleti tekuychuba kusebenta, nobe banetikweleti letinetilinganiso leshintjashintjako letinfashintja tibe ngetulu njengobe linani lentalo likhula nje, labo kumele babonise nemboleki wabo mayelana nekuhlelwa kabusha kwemali nobe kuguculwa kwesikweleti sabo. Kwenyuka

kwenzuzo yetindleko kungalimata inzuzo, ngakoke umlimi kumele acocisane nemboleki timali wakhe kutsi abuke simo sakhe setimali. Kufakelwa imali kutekulima kungaba yindlela lebalulekile yekuchubeka nekukhucita, kukhulisa imisebenti, nobe kwetama emabhizinisi lahlukene. Ciniseka kutsi wakhe buhlobo lobucinile naloyo longumboleki wakho wetimali. Imali lephakeme yaemaphesenti kanye netindleko temikhicito bekuyincenye yetinkinga tekuhambis kwemali epulazini kulomnyaka.

Iyini i-FPSU?

i-Farmer Production Support Units (FPSU) isita balimi ngekuniketa tindlela tekukhucita, ticokelele lokukhucitiwe, ticine lokukhucitiwe phindze bentele timakethe letibomakhelwane.

Imisebenti ye FPSU

Balimi batawutfole ematfuba lamanyenti ekusebenta latawuniketwa yi FPSU lafaka ekhatsi nalamanye labaliwe kulawa lalandzelako:

- Kulawula kokungena kwetinsita tekulima, ngekunaka buhle, linani kanye nekucinesekisa kokutfulwa njalonjalo kwetinsita
- Kulekelelwa ne kuceceshwa, lokutawunikatwa ngekusebentisa emanyuvesi, nalabaphotfulile kutekulima kanye ne Narysec letawusebenta ngekubambisana ekutfutukiseni balimi kusukele eminyakeni lengetulu kwale 10 letako.
- Kwelekelelwa ngemathulusi ekusebenta lafana ne (kushayela tigulumba tractor, kutselela, kuvuna nalokunye).
- Tindzawo/ emagumbi lahlukene lanemishini yokusebeta
- Kusekelwa ngetekubala, lokufaka ekhatsi kutfulwa kwetidzingo ncanti tekulima njenge nhlanyelo, manyolo, tisebenti, umhlaba

nalokunye lokunyenti, nekutfutswa kwesivuno siyonakekelwa ngekuhlanteka nekutsi kupakwe, bese kutfutselwa etimakethe letibomakhelwane.

- Tikhungo letiyinhloko letimele kubuka kusebenta nemathulusi ladzingekile
- Kukalwa kwesivuno/titjalo nesitoko
- Kulungisa, kuhlela, nekuhlola kwalokuvuniwe kwentele timakethe
- Kupakwa kwaletivuno kuyiswe etimakethe letibomakhelwane
- Kugcinwa kwetivuno kwentela tikhatsi letitako
- Kusilela timakethe letibomakhelwane (small-scale mills etc)
- Tindlela letahlukene tekutsengisa nekutsengisela timakethe letibomakhelwane
- Kuniketa ngelwati lemakethe mayelana nelinani lekutsenga nekutsengisa (ICT)
- Balimi labatawufuna umsebenti nekulekela kwe FPSU batawubhalisa ne-FPSU lebatatikhetsela yona
- Indzawo yokutfutukisa nekuceceshwa kwemabhisinisi lamancane
- Kubhanga
- Phetiloli (energy centre)

Kuphatfwa kwe-FPSU

Kwetfulwa kwaloluhlelo lwe-FPSU kulawulwa ngekubambisana kwe-SAFDA, Litiko Letekulima, Kutfutukiswa Kwetindzawo Tasemaphandleni kanye Nekulungiswa Kwemhlaba. Ngekusho kwesimo saleyo naleyo ndzawo kunetindzawo letingetulu kwayinye temishini yekugaya/kusila

I-SAF ayikhicitwa kusuka kuphethiloli losuselwa ku-petroleum kodwa kusuka etintfweni letisetjentiswako letiphilako, leifanana nemoba, ummbila, tinhlavu letinemafutsa, tinhlanyelo letingasito tekudla, imfucuza, tinsalela, ema-agae biomas,

nemagesi e-CO kusebenta. Tebuchwepheshe tivunyiwe kwanyalo ekuukhiciteni ema-SAF kusetjentiselwa "kupompaemafutsa" lokusho kutsi angasetjentiswa kumitfolusito lefana naleyo ye-jet fuel, ngaphandle kwelushintjo. I-SAF iyafana nemakhemikhali njenge jet fuel yemvelo kepha iinganciphisa kukhicitwa kwe CO2 kwetetfutsi.

KWESEKELWA KWEMISEBENTI YEMHLABA

I- International Civil Aviation Organization (ICAO) iyi- United Nations agency, leyasungulelwa kusita emave kutsi abelane ngekuhlanyanyela kwetigabs tetindiza. I- ICAO isita emave langu-193 lahlanyanyele ku-Chicago Conventon ngalesikhatsi enta futsi atsatsa emazinga, tindlela, kanye netinchubomgomo tekulwa kwetive.

Emalunga e-41st International Civil Aviation Organization (ICAO) Assembly, atimisele kusebenta ngekubambisana

kute alwele kufinyelela kumgomo wekuhlanganisa umhlaba wonkhe wekukhicitwa kwekukhishwa kwekhabhoni lokungu-zero ngemnyaka wa-2050.

I-International Air Transport Association (IATA), lekuyinhlango yemakhasimende etindiza temhlaba lemele tinhlango letibslwa ku-290 nobe 83% wetinhlelo letiphelele tetindiza, uvume lesincumo sekwenta umkhakha wetekutfutsa ngetindiza emhlabeni wonkhe

kutsi ufinyelele emazingeni langakho emtsetfweni nga-2050. Ngekuya ngekwesilinganiso sekukhula kwetidzingo tekuhamba ngetindiza, loku kusho kutsi tigidzi temathani langu-21.2 kutawudzingeka kutsi ancishiswe kusukela nyalo kuze kube ngu-2050. I-SAF ke-yona ilindzeleke kutsi ifake sandal sekunciphiseni lokungu-65% wekukhishwa kwetigaba tetindiza kumave emhlaba kute kuhlanguabwetwane nemigomo ye-carbon zero lehlosiwe ya-2050.

KUNGANI TINDIZA TEMHLABA WONKHE KANYE NETIKHUMULO TETINDIZA TISEKELA I-SAF:

- Kwengeta kuloku losekushiwo kwe net-zero emission nga-2050, lemiphumela lelandzelako ibonakala ikhutsata tidndiza temhlabawonkhe kanye nekwesekela i-SAF:
- Lenye indlela lehlantekile yekusebentisa emafossilfuel, leyenta kutsi kube nekunciphisalokungafika ku-80% ekukhishweni kwe GHG ngesikhatsi sekuhlolwa kwemphilo yaphethiloli.
- Sisombululo se Dop-in lesivumela tindiza kutsi tinciphise kungcola ngaphandle kwekwenta lutfo/

ngekwenta imali lencane

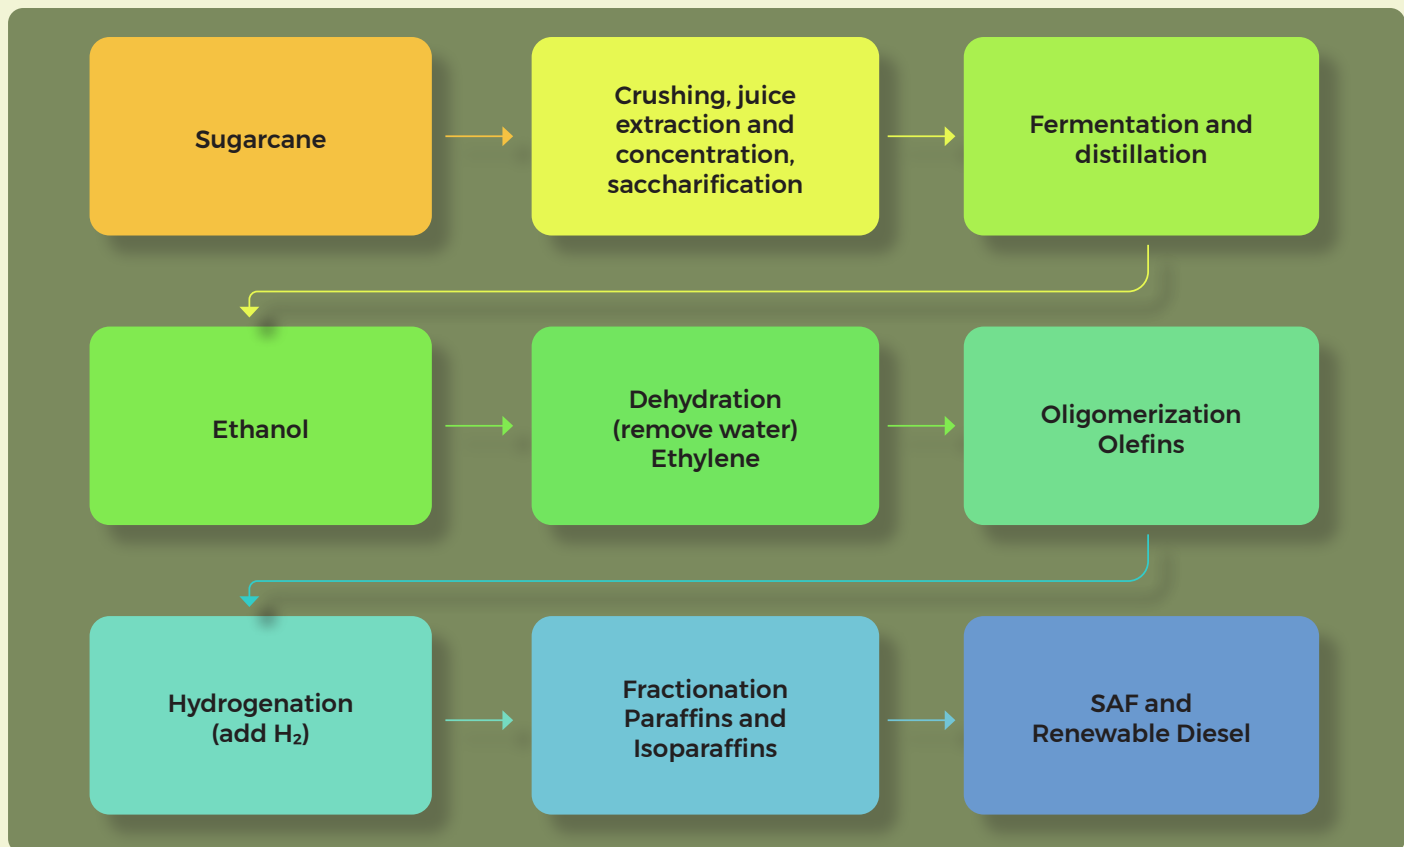

- Kubekwa njengemhlindlela kanye nemkhakha wekwanga imvelo
- Tidzingo tekwetsembeka letihlangabetene netimali, emakhasimende kanye netiphatsimandla tekulawula
- Kusekela kunciphisa simo selitulu ngekunciphisa kungcoliswa kwetigaba tekukhucita
- Kusita imboni yetekutfutsa kutsi ihlangabetane nemigomo yayo yekusimama kanye nemigomo yekunciphisa i-GHG

I-SAF IKHUCITWA NJANI

Tindlela letehlukene tekukhucita kanye netintfo letisetjentiswako kungasetjentiswa kikhucita i-SAF. Kunetindlela tekukhucita leti-9 te-SAF letinye tacinisekiswa futsi tagunyatwa mhlabawonkhe ngaphansi kwe- American Society for Testing and Materials (ASTM) under ASTM D7566 standard kanye ne-ASTM D1655 standard.

ASTM International Standard	Technology Pathway	Potential Feedstocks	Blending Limit (%vol)
ATSM D7566	Catalytic Hydrothermolysis Jet Fuel (CHJ)	Waste oil, algal oil and vegetable oil	50%
ATSM D7566	Alcohol-to-jet synthetic paraffinic kerosene (AtJ-SPK)	Ethanol, iso-butanol, industrial off-gases Sugar crops: sugarcane, sugar beet Lignocellulose	50%
ATSM D7566	Hydroprocessed fermented sugars to synthesised iso-paraffins (SIP)	Sugar and starch crops	10%
ATSM D7566	Fischer-Tropsch synthetic paraffinic kerosene plus aromatics (FT-SPK/A)	Lignocellulose	50%
ATSM D7566	Fischer-Tropsch synthetic paraffinic kerosene (FT-SPK)	Coal, natural gas, Lignocellulose: agricultural and forestry waste, invasive alien plants (IAPs), municipal solid waste, energy	50%
ATSM D7566	Hydroprocessed esters and fatty acids (HEFA) Synthetic Paraffinic Kerosene (HEFA-SPK)	Animal fat, waste fats, greases vegetable oil: used cooking oil, Solaris oil, camelina, jatropha	50%
ATSM D7566	Hydroprocessed hydrocarbons (HH-SPK) or hydrocarbon hydroprocessed ester and fatty acids (HC-HEFA)	Oils from Botryococcus braunii (algae species)	10%
ASTM D1655	Co-processed fats, oils and greases (FOG)	FOG from petroleum refining	5%
ASTM D1655	Co-processed Fischer-Tropsch (FT) Hydrocarbons	FT-syn crude with petroleum	5%

Umoba lona lobonbakala unemsebenti lomcoka, tindlela tebuchwepheshe be-AtJ letitfolakala ngeLanzatech, Axens, ne-Honeywell UOP kungaba yindlela yetebuchwepheshe. Indlela lelula yekusebenta kwemoba kwenta i-jet fuel iboniswe ngentasi:

IKHICITWA KUPHI FUTSI ISETJENTISWA KUPHI I-SAF

Ngekusho kwe-IATA, ngemnyaka wa-2022, umkhicito we-SAF walinganiselwa ku 300 yetigidzi temalitha (ngaphansi kwa 1% wemhlabawonke wekusebentisa i-jet fuel). I-ATA ilindzele kutsi umkhicito wemandla lavuselelako ufinyelele tukwe mandla lalinganiselwa ku-69 wetigidzi temalitha ngemnyaka wa 2028 ngalokulinganisiwe, lokungenani umkhicito longaba tigidzi letingu 100 ngemnyaka wa 2030 utawube uta kahle kakhulu. Uma kungukutsi 30% waloko lokwakhicitwa yi-SAF, lomkhakha ungakwati kufinyelela kumalitha latigidzi letingu-30 lokungaba ngumkhicito we-SAF 2030. Kuwo wonke umhlaba kanye nakulamanye mave phakatsi kwakulase-EU, e-US kanye nase-Asia, tikhumulo tetindiza letikhulu tiniketa tiphindze tisebentise i-SAF. Tilindzeleke kutsi tikhule timfuno netidzingo talamave lokubangelwa miklamo yasendzaweni kanye nemiklamo

lehliliwe, kuhlenganiswa kwemandla, tinzuzo temakhredithi ekhabhoni kanye netivumelweno letitsetfwe.

I-Board ye Airline Representatives South Africa (BARSA) iveete kwekutsi tindiza letingetulu kwa-450 000 seticalile kusebentisa inhlanganisela ye-SAF kanye nemafutsa lavamile, futsi tindiza letingetulu kwa 50 emhlabeni wonke nyalo setinelwati lolutsite nge-SAF. Imakethe ye-SAF kulindzeleke kutsi ikhule, kantsi nekusisa lokuhlosiswe kwe-capex kukhomba ngalokucacile kukhula lokuhlosiwe nga-2050:

EU and UK:

~150 SAF refineries with ~250 billion Eur capex investment

US:

~250 SAF refineries with ~ 400 billion USD capex investment

TINDLEKO TE-SAF

I-premium ye-SAF ngetulu

kwemali lekhicitwa ngemafossil fuel ayikalindzelwa kutsi yehle esikhatsini lesitako, lokusho kutsi lenkapani yetindiza itawudzinga sikhutsato lekhulu setimali kute ikhone kuntjintja

Tihambi tingakhokha imali lengu 3-14 USD ngelithikithi nga 2030 na 13-38 ngelithikithi nga 3050 (ICAO LTAG)

Ngekusho kwe-WWF (2022) i-Blueprint yekukhicitwa kwe-SAF e-SA kuye ngekutsi tintfo letisetjentiswako, indlela kanye nendlela yetheknoloji, kubita kwe-SAF kungahluka kusuka ku-R28/l kuya ku R66/l. Nanobe i-SAF yonkhe ibita kakhulu kunephethiloli yejet leyetayelekile, leminyeye imikhondvo seyivele ikhona kuhlanguketana netindleko te-SAF kulamanye emave kantsi leminyeye leminyenti ingahlangatana naletindleko temali yetikhungo tekulungisa kanye /nobe tindleko tekusebenta tingabancishiswa ngekusekelwa ngemigomo nobe ngetimali letitsite.

KUKHONA YINI KUVIKELEKA E-NINGIZIMU AFRIKA?

- Emathani lalinganiselwa ku-400 000 ashukela longatfunyelwa ngaphandle angakhicita 228 800 m³ we-ethanol ngemnyaka, lapho khona 114 000 m³ ngemnyaka we-SAF.
- Ematfuba kanye netinsayeya lokumele kubhekwanw nato:

Markets

Labatsenga i-SAF batawukhokhela intsela ye-SAF lesuselwa kulinani leSA Sugarcane

International airlines choose to refuel with SA Sugarcane Crop based SAF at SA Airports

Crop based SAF will not qualify and be able to generate EU SAF credits

SA Sugarcane based SAF could access individual countries, and strong potential for the Asia market.

Financial viability

Sugar not sold on the local market could be directed to SAF production, provided the revenue beneficiation back to sugarcane industry members is better than export market.

Current export sugar prices ~R11 805 cf 6 year average export sugar price ~R5 656, a difference of ~ R6 149

Sugar industry legislation, agreement and regulations include industry divisional proceeds for new industry products like SAF

Investors and financing institutions finance consortium of key players to invest in sugarcane to ethanol and ethanol to SAF/Renewable Diesel Facility while also accelerating transformation and sustainable diversification of the sugarcane industry

Long term investment view - is investment in ageing infrastructure and technology the most financially viable option

Policy and Regulation

SA local policy currently does not exist.

Sugarcane industry meets the internationally required RSB or ICCT certification standards for exported SAF. Investment and certification readiness is likely required across the sugarcane industry.

Critical to BARSA is clear policy positioning on any potential SAF mandate in South Africa coupled with a rigorous broad-based consultation process on tax incentives, subsidy and financial support mechanisms.

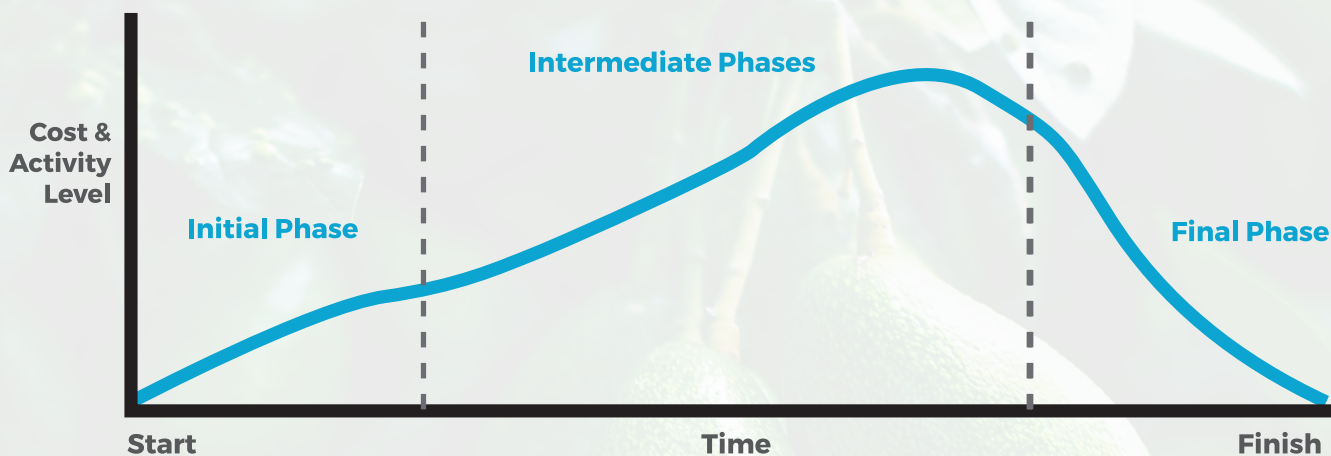

Sifundvo sekuhlola umkhakha we-SAF kuhlolwa kwekusebenta kwaso lokuchutjwa ngekubambisana ne-IDC, kwanyalo kuyachubeka. Luhlelo lwekucedza lihlolo lwe-SAF lwemkhakha lokungenani lutawetimali, i-SAFDA ifisa kuhlanyanela kanye nekusebwentisana nebalngani labatsintsekako ekukhiciteni i-SAF,

kuniketwa kwe jet fuel, buchwepheshe kanye nemkhakha wetekuvakasha (titindiiza), kuletsa i-SAF kutsi ibe yincenyenye yemakethe ye-SAF yesikhatsi lesitako semhlaba wonkhe kanye nekunikela ku-net zero emission target yanga-2050.

Kubuyisewa kwemali yase-Melmoth Restitution Transitioning to the last Phase of Co-management Agreement

S'fiso Mnguni:

Head: Grower Development

Lelisuku lamhlaka 1 Mabasa 2023 limise ingucuko yekusebenta ngekubambisana emkhatsini we-SAFDA kanye nemiphakatsi

yayo lemine lenganyela nayo yase Umthonjaneni/Melmoth of Entembeni Community Trust, Isizwe Sakwa-Dludla Community Trust, Makhasaneni Community Trust ne-Entembeni Royal House Community Trust. Lengucuko iyibonile indlela yekuphatsa ngekuhlanganyela kusuka ekuphatseni ngekuhlanganyela kuya ekutiphatseni ngekuhlanganyela. Kuyincenye lebalulekile yekulungiselela kuphuma kwe-SAFDA ekucaleni kwa-2025, lokutawube kuphawula kuphela kwesivumelwano seminyaka lasihlanu lesentiwa nemiphakatsi.

Ngetindlela tekusebenta, kungena esigabeni sekugcina sekuphatsa ngekuhlanganyela

kusho kutsi tinkampani letisebentako ticala kulawula umsebenzi, baphatsi labasetikhundleni letisetulu batsatsa tindzima letholako, baphatsi labasetikhundleni batsatsa tincumo, baletse imibiko yekusebenta, ema-accountants asemphakatsini ayahlanganiswa etindzabeni tetimaali netemabhuku. Babhalisi bemiphakatsi nyalo basebenta ngekubambisana nema-accountants eSAFDA Farm Management Services (FMSC) lebekadze aphantsa ema-akhawunti. Imininingwane yetimali yenyanga iniketwa umcwaningi mabhuku nalowemphakatsi bese wetfula imibikoyetimaliemhlanganweni webaholi bekomiti.

Tinhlangano letisebentako

Indlela lehlanganisiwe yekuphatsa imisebenti ingulencomekako kakhulu sikhatsi lesidze uma umphakatsi waseMelmoth ufuna kukhulisa kusebenta kahle bese utfola inzuzo epulazini.

tinemtfwalo wekuphatsa timali temphakatsi, lebetiphatfwa ngalokusemtsetfweni yiSAFDA Farm Management Services (FMSC) kantsi ke-yonkhe imali yemphsakatsi iyendluliselwa kuma-akhawunti abo ebhange. Emakhodi tebalimi, labekadze abhaliswe egameni le-FMSC sekabhaliswe emagameni emiphakatsi. Loluhlelo lwekutsengiswa kwetintfo letitfolwa ngummango luyayekela kusebenta njengobe tiogayo tiyibhadala matfupha yonkhe imikhicito kuma-akhawunti emmango.

Tindleko letifanele tiyalandzelwa ku- Draft budget yemnyaka kantsi kutawuba nemahlandla lamatsatfu ekubuyeketwa kwaloluhlelotimali njalo ngemyaka-F1, F2 na F3. Ibhajethi iyincwadzi lephilako kansti

ke, itawugucuka njengobe imisebenti igucuka kuya kungucuko lelinganiselwe, nekukhula kwetindleko tekusenta, njll. Ema-akhawunti ekuphatsa nawo ayalungiselelwa futsi etfulwe ngesikhatsi lesitsite. Letindleko titawuvuselelwa ngenyanga futsi tishintje ngekuya kwetindleko letentekile kanye nemali letfoliwe. Imiphumela yekuvuna itawulandvwa ngesikhatsi sekuvuna futsi kutawubakukhona emabhodi nemibiko yekuvuna.

Indlela lehlanganisiwe yekuphatsa imisebenti ingulencomekako kakhulu sikhatsi lesidze uma umphakatsi waseMelmoth ufuna kukhulisa kusebenta kahle bese utfola inzuzo epulazini. Inkapani lehlanganisiwe yebantfu

bendzawo lebitwa nge-Umthonjaneni Harvesting seyakhiwe futsi seyivele inakekela imisebenti yetekulima yebantfu bendzawo.

Ngekuhambisana naloku kuniketwa kancane kancane kwemsebenti wekuphatsa, i-SAFDA yenta luhlolo lwekulungela kwemphakatsi ngamunye. Tikhombandlela letisandza kuvela tikhombisa kutsi kungenteka kutsi kuphumsa kwebantfu kuvele ngetiikhatsi letehlukene njengoba leminyane imiphalatsi seyivele iveta kutimisela kwayo kutsi ihambe nayo yonkhe imisebenti ngekwayo kansti leminyane seyivele icala kutsi kwandziswe lobudlelwano.

Kusebenta ngelubanjiswano lolusemkhatsini weSAFDA kanye nemiphakatsi lemine yase Melmoth Trusts kwatfola i-Mid-Term Review cishe iminyaka lemitsatfu ngemuva kweTivumelwano Tekuphatsa Letasayinwa emkhatsini walabatsintsekako.

Sekucishe kube yiminyaka lemitsatfu kusukela iSAFDA yangenela Tivumelwano teminyaka lesihlanu Tekuphatsa ngeKuhlanganyela neMiphakatsi wase Emakhasaneni, Entembeni, Entembeni Royal ne-Isizwe Sakwa Dludla eMelmoth.

Lemiphakatsi ingulemine yalena lesihlanulephumelelaekufuneni umhlaba wawo ngekulandzela uMtsetfo wekuBuyeketa pheceleti Restitution Act (Act 22 of 1994). Umhlaba wabo wabuyiselwa nga-2019 ngekusebentisa Sivumelwano lesentiwa ngekulandzela Umoya Wenkantolo emkhatsini weKhomishini Yekubuyiselwa Kwemalungelo Emhlaba

kanye nebanikati bemhlaba bangaphambilini nga September 2019.

Kuletinyanga letisihlanu letendlulile, i-SAFDA nemiphakatsi lemine kanye nemabhizinisi abo lasebenta ngekuhlanganyela, beseloku batibandzakanye ekubukusiseni lokusebenta ngekubambisana. Lokubuyeketwa bekugcile kakhulu etintfweni letentekile kuze kube ngunyalo, tinkinga kanye nesimo sekulungela kwetikhungo temphakatsi kutsi ticale kancane kancane kutsatsa kuphatsa imisebenti yetekulima. Lomsebenti, njengalokubuyeketa lokufanako, bewumatima, ucinile, ngalesinye sikhatsi uyinsayeya kodvwa

uphindze ube mnandzi.

Bantfu labanyenti lebebangakholelwa kutsi umhlaba utawubuyiselwa, ikakhulukati labo lebebanemhlaba, bebakholelwa kutsi lomsebenti wekulima bewutawuvele uphelelwe ngemandla, njengobe kunjalo nangemisebenti leminyenti yekulungisa umhlaba. Lamabhizinisi solo akhona futsi anato tonkhe tintfo letingabasita kutsi baphile sikhatsi lesidze. Sifinyeto lesifishane sekuhlelwa kabusha kwemitsetfomgomo lephatselene netinchubo tekufaka ticelo temvumo yekusebentisa emanti netingucuko

I-Department of Water and Sanitation (DWS) lashicilela imitsetfomgomo mhlaka 19 May 2023 lokwentelwe kutsi bantfu bawati kuphawula. Lemitsetfo iphatszelene ne National Water Act, 1998 (Act No. 36 of 1998), njengobe uchitjiyelwe.

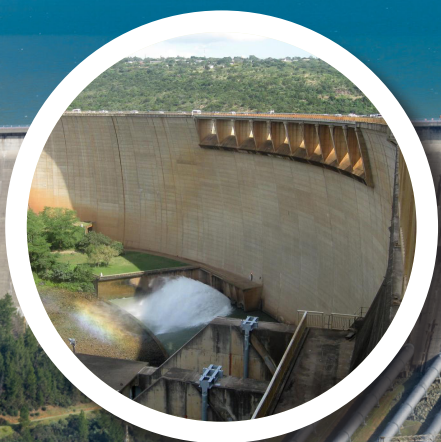

Injongo yalemitsetfo

Injongo lenkhulu yalemitsetfosimiso kubeka indlela kanye netidzingo tesicelo selayisensi yekusebentisa emanti (WUL) kanye nekuguculwa nobe kuvuselelelwa kwe WUL.

Nguyiphi indlela yekusebentisa emanti latjentiswako ngekulandzela uMtsetfo waVelonkhe weManti.

- Kutsatsa emamnti kumitfombo yemanti
- Kugcina emanti lasedvute nobe kugucula kuhamba kwemanti emseleni
- Kwelekelela emsebentini yekunciphisa kugeleta kwemanti

- Kwenta umsebenti wokulawulwa kwemanti
- Kukhipha tibi emtfonjeni wemanti ngemaphayiphi, nobe ngaletinye tindlela
- Kulahlwa kwemanti ngendlela lengaba nemtselela lomubi emtfonjeni wemanti
- Kulahla nanobe ngabe nguyiphi indlela kwemanyti lafaka ekhatsi imfucuza nobe leye yashiswa kunobe ngabe nguyiphi inchubo yetekukhicitu nobe yekukhicitu gezi
- Kugucula umbhedze, emabhange, indlela nobe timphawu temanti
- Kususa, kukhipha nobe kuylahla emanti latfolakala ngaphansi kwemhlaba uma kungadzingeki kutsi kuchubeke ngemphumelelo kwemsebenti nobe kuphephise bantfu
- Kusebentisa emanti ngetinjongo tekutijabulisa

Inchazelo yeluhlelo lwemitsetfo

Loluhlelo luhlanganisa emkhatsini weletinye tintfo, sikhatsi, kusetjentiswa nekulungiswa kwema-WUL, ticelo tekutfufukisa kulingana kanye nekulungiswa k w e k u b a n d l u l a n g e k w r b u h l a n g a k a n y e n e k w e b u l i l i , s i c e l o k a n y e

nakulungiswa kwekuvuselelwa noma kuguculwa kwe-WUL, imali yekulungisa, kuniketwa kwemvumo yekusebentisa emanti kanye netidzingo netinchubo tekuhlanganyela kwemphakatsi.

Lemitsetfo isekele kuhambisana kwemagunya aleLitiko kanye namagunya alamanye ematiko ahulumende ekutsi ticelo te-

WUL letidzinga kugunyatwa ngekweMtsetfo we-Mineral nePetroleum Resources Development Act, 2022 we National Environmental Management Act, 1998 nobe umtsetfo lotsite wekulawulwa kwesimo sendzawo kumele tifakwe bese ticutjungulwa ngendlela lehlanganisiwe.

Key highlights

- I-DWS ihlose kuniketa ticondzisa ngaphambi kwekufaka sicelo ngekusebenta luhlelo lwe-Department's e-WULAAS electronic system futsi uma kudzingeka ngekuhlola indzawo.
- Lesi sigaba lesibalulekile kumuntfu lofaka sicelo kutsi acondze lwati loludzingekako ne miculu lokumele ifakwe ku-WUL.
- Ticelo letinyenti temvume yekubanjwa kwemanti kwentela imisebenti lafanako nyalo tingahlanganiswa tibe yinye, kwentela kunciphisa lenchubo.

- I-DWS kumele iphendvule ngekubhala kungakendluli tinsuku letintsatfu tekutfola i-WUL—ngekwemukela nobe kwala i-WUL kanye nekuniketa tizatfu uma kuholela ekwaleni.
- Labnafake ticelo kumele bati kutsi sicelo sekwencatjelwa kutsatfwa ngekutsi sesiphetsiwe futsi kutawudzingeka kwekutsi kufakwe sicelo lesisha uma lomsebenti usafuna kuchutjwa.
- Sicelo se-WUL sicedwa ngemalanga langu-90

Lenqubomthetho ihlose ukulekelela ushintsho ekutholeni igunya lokufinyelela nokusebenzisa amanzi, ngokubhekana nokucwasana baphambilini obuthinta ukulingana, ibala nobulili.

- Banftu labamnyama ngibo labatawuniketwa litfuba lecuka bekucala bese kulandzele labasikati.
- Tonkhe ticelo temabhizinisi ekusetjentiswa

kwemanti, kumele tinikete sabelo kubantfu labamnyama.

- Ngekuya ngecutfolakala kwemitfombolusito, i-DWS ingasita bantfu labamnyama labafaka ticelo te-WUL ngekuhambisana neMtsetfo waVelonkhe weManti ngaphamnbi kwekutsatfwa kwesincumo sekugcina kulesicelo.

Sigaba 21 a kanye na-b Kutsatsa emanti nekugcina emanti	Sigaba 21 (d) Kuhlanganyela kumklamo wekunciphisa kugeleta kwemanti	% Wemasheya labelwe labamnyama

Ngetulu kwa 1 000 000 m ³	Ngetulu kwa 1 000 ha	75%

- Kuvuselelwa nobe kutjintjwa kwe-WUL kusenesikhatsi kutawentiwa ngaphansi kwetikhatsi letingafani, kepha nanobe kunjalo lokutjintjwa kumele kucale cishe ngemalanga langu-250 ngembi kokuba kufike tinsuku tekugcina te-WUL.
- Ingucuko lencane yemalanga langu 30
- Ingucuko lesemsetfweni yemalanga langu 50
- Kuvuselelwa loku sheshako kanye netingucuko tesikhatsi selilayisensi emalanga langu-60
- Kuvuselela lokusheshako kanye netingucuko tesikhatsi selayisensi kanye nekusetjentiswa lokusha kwemanti emalanga langu 90

● I-DWSkumele iphendvule ngekubhala kungakapheli emalanga lasihlanu (5) ngemuva kwekutfolo sicelo sekuguculwa kwe-WUL, ngekwemukela nobe kwencaba i-WUL, ngekuniketa tizatfu uma kuholela ekwencabeni.

● Imali yekufaka sicelo langanakubuyiselwa -tindleko tehluke kusuka-R2 150 kuya ku R15 000 ngekuya ngesicelo, kuvuselelwa ngaphambi kwesikhatsi, kuntjintwa,

kuniketwa kwemvumo ngenkhani, nobe sicelo sekwephuta kwetinhlobo tetekulima netemahlatsi; ema-SOE, bakhiciti betakhiwo tangasese kanye nahulumende kanye nekwetfulwa kwesicelo sekukhishwa kwemali yekwelashwa kwesicelo

Lomhlangano bewubanjwe

nguMengameli we- SAFDA, Dkt. Siyabonga Madlala, waphindze wasebenta njengelipulatifomu lekwatisa bakhiciti mayelana netinhlelo letitako te-SAFDA kanyenetinyatselotekutfufukisa intfutfuko kanye nekuphumelela kwabo. Ngekugcina balimi bati futsi babandzanyekile, i-SAFDA ifuna kucinisekisa kutsi batfola kwesekelwa kanye nemitfombolusito ledzingekako kucedza tinsayeya tabo kanye nekuphumelela kulomkhakha lotfutfuka njalo.

Lencenye yemitfombolusito letfolwe kubantfu labatsintsekako ifaka ekhatsi i-Eskom, leyakwemukiela kutsi, ngekungafani nebalimi labakhulu labatsengisa umoba labangatsembela kuma-grid yemandla agezi etinhlelweni tekunisela. Loluhlelo lokonga gezi ngekuwuncamula kuphatamisa kakhulu kulomsebenti lobalulekile,

futsi kubeka engotini kukhula kwenhlanyelo kanye nemkhicitowelipulazi. Balimi bemapulazi lasemancane bemoba benta imali yekutsengisa tintfo letitsite letidzingekako, lokwenta kutsi bancike kakhulu kumandla agezi lokhishwa yi-Eskom. Kantsi ke-yona iyati kutsi kunemiphumela lemibi lebangelwa nguloluhlelo lokuncamula kwemandla agezi lebabukana nabo labalimi bemoba futsi inenhloso yekusebentela kutfola tisombululo letisebentako kute kuncishoiswebumatima labahlangabetana nabo balimi. Kulokunye lokwenteka emmangweni wekulima umoba eKomati, kwabikwa litiko letifo kutsi kwavela sifo se-orange rust emobeni nalokwabonakala emalangeneni enyanga ye-Indlovulenkulu. Lesifo lesibulalako silimata kakhulu kukhicitwa kanye nemnotfo wemapulazi kuleyondzawo.

Kubona lesifo ngesikhatsi lesifanele kanye netinyatselo letitsatfwa balimi bendzawo kanye netiphatsimandla tetekulima kubalulekile ekunciphiseni lokusabalala kwalesifo kanye nekuvikela lomkhakha.

Linjani lilanga lelivamile e-SAFDA?

Kuliciniso, luhlanganiso lwelihhovisi ngemuntfu kanye nemihlangano lengasiyo ye-Internet, bese kuba nemihlangano leyehlukeni, imihlangano yemiklamo kanye nemihlangano assisting. Nanobe kunjalo, siyabonga ngendlela itheknoloji lesintjintje ngayo, isente sakhona kuchumana kuto tonkhe tincenye taseNingizimu Afrika nasemaveni emhlaba kute sihlanyanele emikhankasweni. Ecinisweni, tinkhulumiswano tetfu tekucala ne-India, Brazil kanye ne-US kanye ne-DFI e-SA, ku-SAFDA Milling kanye ne-Diversification Projects tibanjwe ngekusebentisa emapulatifomu lafana ne-Zoom kanye ne-Teams, kusindzisa imali yetfu kanye nekusebentisa sikhatsi setfu kahle. Ngititfobile futsi ngibusisekile kutsi ngisebente neSAFDA kanye nelicembu leliphucukile kanye nelitfufukisako le-Exco, balingani labanelutsandvo ngaloko labakwentako, labatinikele kakhulu futsi baphelelisana ngekwetfula umbono we-SAFDA, umsebenzi kanye netindzawo tekugcila. Ngiyabonga kubangani bami lengisebenta nabo ngekungivumela kutsi ngibe yincenye yelicembu lenu, kutsi ngifundze kini futsi ngifake sandla ekuguculeni kuphila kanye nemiklamo ye-SAFDA - Dokotela Siyabonga Madlala, Nks Lee Hlubi, Mnu. Thandokwakhe Sibibi, Mduduzi

Dube, Sfiso Mnguni, Mnu. Mduduzi Shabane, Andile Buthelezi, Anwhar Madhanpall kanye naMnu. Moses Mkhabela.

Yini leyakwenta wakhetsa lomsebenti?

Ngingasho kutsi isayensi yami, lucwalingo kanye nekwehlukahlukana kanye nemsebenti wetekulima 'ngekwemvelo' sekutfufukile.

Ngabe yini leyenta iSayensi neTekulima tihlobane ngekwelizinga lakho lemfundvo?

Ngikhumbula emavi lashiwo nguthishela wami waseNyuvesi Roland Schulze ngetikhatsi tekufundza kwami ngemanti lapho abevame kusitjela khona kutsi indlela lencono yekuvisisa indzawo yekugeleta kutsi ube khona lapho. Ngiyakholwa kutsi ngisho nasetindzabeni tetekulima, njengoba ngidzinga emathulusi lanjenge-laptop kanye nelucingo kute ngikwati kwenta umsebenti wami, ngaphandle kwekuphuma ngiye ensimini ngichumane naloko lokufundzako (sayensi) nalokwentekako ensimini

(tekulima kanye netimboni), kutfutfukiswa kanye nekuvisisa kutawuba lite. Umbono wami kutsi ticu tiyincenye yemphumelelo yemphilo yakho, yebo ngifundzile, ngisebente kamatima kute ngitfole i-Doctorate yami, kepha simo sekutfobeka lokuchubekako nekufundza sibalulekile. Kufundza akupheli, kunenchubo lechubekako yekutfufuka lengasetjentiswa imphilo yakho yonkhe.

Yini longafisa kutsi yenteke embonini yashukela letawucalwa yi-SAFDA?

Tikhungo letinsha tekusengela kanye nekucinisa kudla lokute emakhemikhali letisebentisa buchwepheshe lobusezingeni lelisetulu, lobusha nalobusebentako, lakhiwe ngekhatsi etindzaweni tekulima tasemaphandleni, kukhicitwa imikhicito lemisha yemakethe yasekhaya neyekuhambisa. Letikhungo kumele timelele kuhlanyanyela lokunemcondvo kwebalimi labancane kuloluhlelo lwekwakha linani, babe balimi kanye nebanikati bemasheya kuletikhungo letinsha. Ngingatsandza

kubona lomkhakha wemoba waseNingizimu Afrika ugucuka futsi ukhula n g e k w e h l u k a h l u k e n e lokuchubekako, uletse inzuzo, uhlale njalo ugcinekile nakutitukulwane letinyenti letitako. Umoba ubhalwe endzaweni yaseKwaZulu-Natal naseMpumalanga ngenhloso lehlukile nalekhetsekile, futsi leyo nhloso kumele ichubeke emakhulwini eminyaka letako.

Ucabanga kutsi tikhona yini tinzuzo letenele tebantfu besifazane kutekulima?

Ematfuba alabasikati kutekulima kanye nemabhizinisi etekulima akhona. Kusuka emapulazini kuye ematafuleni, bomake banendzima, kusukela emimangweni kuya kubosomabhizinisi kuTekulima kanye ne-Agroprocessing/Industrial sector bomake bangabamba lichaza futsi kumele babambe lichaza, hhayi ngoba babomake kodvwa ngoba banelutsandvo, banelwati futsi bangabamba lichaza njengabo bonkhe bantfu.
