NCORA 2022/2023 HARVESTING SEASON

Dr Phiwe Jiba
Project Advisor

Ixesha lika-2022/2023 belihamba kakuhle kakhulu kubalimi kwiNcora Irrigation Scheme. Ixesha liqale ngendlela eqaqambileyo ngombona otyheli, ngokuqhelekileyo okhangeleka kakuhle.

Umbona ulinywa eMzantsi Afrika ukususela ngoOkthobha ukuya ekuqaleni kukaJanuwari owona mhla wokutyala uxhomekeke ekufikeni kweemvula. Elona xesha lifaneleke kakuhle lokutyala umbona empuma liqala ngoOkthobha 1 ukuya kuNovemba 30, ngelixa okona kutyala kufanelekileyo entshona kuqala ngoNovemba 20 ukuya kuDisemba 31. Ukulima entshona kunokude kwandiswe ukuya kufikelela embindini kaJanuwari ukuba amaxesha eemvula afike emva kwexesha. Ngokuqhelekileyo, uninzi lweendidi zombona zinomjikelo wobomi weentsuku ezili-100 ukuya kwezili-120 ukususela ekulimeni ukuya ekuvuneni. Nakubeni kunjalo, elona xesha lichanileyo lokuvuna lichatshazelwa kakhulu zimeko zokusingqongileyo kunye nezinye izinto, ezifana nokuphela kokusetyenziswa kwemveliso.

Ixesha lika-2022/2023 belihamba kakuhle kakhulu

kubalimi kwiNcora Irrigation Scheme. Ixesha liqale ngendlela eqaqambileyo ngombona otyheli, ngokuqhelekileyo okhangeleka kakuhle. Ngokukasihlalo weCPA, uMnu. Ace Thosholo, kwiihektare ezingama-25 ezilinywe umbona otyheli, iitoni ezingama-72 zombona ziye zasiwa kwiFama yeAmadlelo Dairy nto leyo eyenze ingeniso exabisa i-R274 680.00. I-Amadlelo Dairy Farm isebenzise ixabiso eliphumelelayo le-SAFEX lombona otyheli elimalunga ne-R3 815 njengexabiso labo

lentengiso. Baqeshe abahlali abangama-20 kubahlali baseNcora kwaye umntu ngamnye kubo ebefumana umvuzo oyi-R500 veki nganye. Suku ngalunye babehlawulwa i-R100, besebenza ukususela ngo-08h00 ukuya ngo-17h00 emva kwemini. Umbona otyheli ovuniweyo wawugcinwa kwigadi esemva kwendlu kasihlalo kwaye ukuba awugcinwa okanye ulungiswe kakuhle, umbona otyheli ungonakala okanye ungakwazi ukutyiwa ngabantu okanye izilwanyana.

Iprojekthi yeMzola Agro-mix iye yasebenzisa indlela yokuvuna ngesandla. Ukongezelela, ukuvuna ngesandla kwenziwa kuphela kumasimi amancinane kakhulu okanye kwizitiya apho umbona ulinywa ubukhulu becala ukuze usetyenziselwe iimfuno zobuqu (ukutyiwa ngabantu) okanye njengokutya kwezilwanyana zeAmadlelo Dairy. Le ndlela ayizongi indleko okanye yonge ixesha kuba umntu omnye uya kudinga iiyure

ezingama-30 ukuya kwezili-100 ukuvuna ihektare enye yezityalo zombona.

I-SAFDA ne-CPA banqwenela ukuba nabo aba matshini bokuvuna, okanye babaqeshe baze babe nomntu wokubasebenzisa onamava ngexesha lokuvuna elizayo kuba indawo elinyiweyo iza kongezwa ibe ziihektare ezili-100. Ubukhulu becala, umbona uvunwa ngoomatshini, kusetyenziswa oomatshini bokubhula, ukuchuba, okanye bedibene. Ukungaphathwa kakuhle kombona ngexesha lasemva kokuvuna kunokuwuchaphazela kakhulu umgangatho wawo.

Ingcebiso zexesha lokuvuna elilandelayo

- Ukuqinisekisa ukuba banendawo yokugcina esemgangathweni eyakhiweyo ngaphambi kokuba kuqaliswe ukuvunwa. Nokuba sisakhiwo

esitshintshiweyo.

- Ukuqinisekisa ukuba izikhwebu zomiswe ngokwaneleyo ngaphambi kokuba kuqaliswe ukubhula.

- Ukugcina umbona ocoliweyo kwigumbi elikhuselekileyo, nelomileyo. Ukuba uceba ukugcina umbona kangangexesha elithile luqheliselo oluhle kuyinto elungileyo ukubulala izinambuzane kumbona ngeepilisi zokubula izinambuzane uze uzigqume iingxowa ngeseyile.

Nawuphi na umzamo omncinane abawenzayo unokwenza umahluko omkhulu kubungakanani kunye nomgangatho wombona abawuvelisayo nabawuvunayo. Xa amaxabiso ephantsi njengoko ngoku kunjalo ngokomyinge wexabiso le-SAFEX, zonke ezi zinto zingenza umahluko omkhulu xa kufikwa kwinzuzo.

Iprojekthi yeMzola Agro-mix iye yasebenzisa indlela yokuvuna ngesandla.

Imiba emininzi iphakanyiswe ziiprojekthi ngexesha lemiboniso yazo ebibandakanya ukunqongophala kokuthatha inxaxheba kwikhonkco lexabiso kuluntu oluxhamlayo, inqanaba eliphezulu lamalungiselelo lamatyala oshishino lwe-JV, ukungabikho kwabasebenzi abanamava (abasuka kuluntu) abathatha inxaxheba kulawulo lweefama kunye nezikhundla zesigqeba nezokwenza izigqibo, ukungabikho kwenkxaso yasemva kokuhlaliswa emva nje kokudluliselwa komhlaba, ukungabikho kwezicwangciso zokudluliselwa kwezakhono, nenkqubela ecothayo enxulumene nenkqubo yokunikezelwa komhlaba ukukhankanya nje ezimbalwa.

Ubume bangoku bokubuyiselwa komhlaba

Icandelo lokubuyiselwa komhlaba kwingingqo yommandla olima iswekile eNkomazi libone ukuhla ngenxa yemicelimngeni emininzi kule minyaka mi-3 idlulileyo. Iiprojekthi ezintathu zokunikezelwa komhlaba zibe notshintsho kubume bolawulo ngenxa yeemeko ebeziningalindelekangabezisuka ekudluliselweni kweenkokeli zeeprojekthi kunye nengxabangxaba ezidalwe ngamaqela achaphazelekayo, edala umsantsa kumacandelo obunkokeli kwiiiprojekthi ezichaphazelekayo. limeko ezingenakuthelekiswa nanto

zidale ukungazinzi kumacandelo obunkokeli kwezi projekthi nangona ezinye zibuyela kwimeko entle, indlela yokubuyisela ithatha ixesha elide kwezinye zezi projekthi. Kwiiiprojekthi ezisibhozo zokubuyiselwa komhlaba ezithathe inxaxheba kwinkomfa yeIndaba ye-SAFDA yokuBuyiselwa koMhlaba, zine kuphela ezisasebenzayo lo gama ezinye zisazama ukubuyiselwa kwimeko entle, kwaye ezinye zibekwe phantsi kolawulo.

Ukuhlaziywa kweeKomishini zeNkomfa yokuBuyiselwa koMhlaba

Inkomfa ye-SAFDA yokuBuyiselwa koMhlaba ivelise iziqhamo ezithile kunye neqela leekhomishini kunye namanyathelo oko. Le nkomfa ivelise iiseti ezintlanu zeekomishini. IKomishini yoku-1 ibijolise kulawulo lweZivumelwano zeNtsebenziswano eDibeneyo.

• Ngaphantsi kwenyathelo loku-1 lekhomishini elifana nokuhlolisiswa kwezivumelwano zangoku ze-JV, ukuhlolisiswa ukwakheka kobunini be-JV, ukuhlolisiswa kokulingana nebhalansi ngokubhekisele kulawulo kunye nokuthatha inxaxheba, ukuhlolisiswa kweenkqubo zokuqeshwa kwabasebenzi kunye nemigaqo-nkqubo yangaphakathi kwii-JV, ukuncitshiswa kweendleko zokusebenza ze-JV kunye nokubekwa ndawonye kweenkonzo zenkxaso.

• IKomishini yesi-2 iye yajolisa kuhlengahlengiso lwamatyala asemthethweni emva kwenkqubo yophicotho zincwadi lwemali-mboleko kunye neendlela ezithile ebezilungiselelwe ukuhlolisiswa kwakhona kwentsebenziswano. Amanyathelo amaninzi okuzama ukunciphisa umlinganiselo wenqanaba lamatyala kuninzi lommiselo we-JV kwakufuneka athatyathwe apho i-SAFDA iya kuzama ukuthetha namasebe karhulumente i-South African Reserve Services (SARS) kunye neSebe loPhuhliso lwamaPhandle noBuyiselo

• IKomishini yesi-3 iye yajolisa kumanyathelo alungiselelwe ukuphuculwa kophuhliso lwezakhono kumiselo lwe-JV ukuze uluntu lukwazi ukuthatha izigqibo kwimisebenzi. Ngethuba lale nkomfa kwafunyaniswa ukuba kweminye imibutho ye-JV, izicwangciso zophuhliso lwezakhono zibhalwe phantsi qha kwaye eminye ayinazo kwaphela. Imfuno yophicotho lwezakhono iye yaphakanyiswa yaza yamiselwa yi-SAFDA kunye nethuba lokuseka iphaneli yokubeka iliso nepaneli yokuhlola enoxanduva kuphela kwiiiprojekthi zoluntu kuphuhliso lwezakhono.

• IKomishini yesi-4 iye yajolisa kuphuhliso lwamashishini kunye nothatho nxaxheba okunentsingiselo ngokwezimali koluntu kwimisebenzi yentsebenziswano. Iingxoxo ezisuka kwimiboniso yeeprojekthi zoluntu ziveze ukuba akukho ntathonxaxheba okunentsingiselo kwimveliso yomoba kwaye akukho zicwangciso zexesha elizayo koosomashishini baseluntwini ukuba bangene kumathuba okhonkco lwamaxabiso aziswa ngamahlakani. Njengamananyathelo okukhawulelana nolu celomngeni kuye kwafuneka ukuba amahlakani aze nezicwangciso zophuhliso lwamashishini. Izicwangciso zophuhliso loshishino zaziza kuqulunqwa kuze kwabelwane ngazo noMEC woPhuhliso loQoqosho kwiphondo. Amathuba ohlukahlukene aye aphononongwa.

• IKomishini yesi-5 iye yajolisa kulawulo lokubamba umhlaba kunye namaqumrhu oshishino kunye nenkalo yophuhliso loluntu lwentsebenziswano. Imiboniso ngeeprojekthi zoluntu

iveze ukuba uninzi lwezahlu ezihlawulwe kubaxhamli ziye zehla kwaye uninzi lwazo ziphuma kwiirenti zomhlaba kodwa ingeyiyo ingeniso yentsebenziswano. Amanyathelo okujongana nombala weKomishini yesi-5 ibe kukusekwa kolamlo kunye nepaneli yokusombulula ungquzulwano ukuze incedise kwimiba yangaphakathi neyangaphandle.

Iziphumo ezincumisayo kwiminyaka emine emva kwenkomfa.

Onke amanyathelo ekomishini yenkomfa yeSAFDA yokuBuyiselwa koMhlaba ye-SAFDA aye ngelishwa achatshazelwa ngubhubhani wehlabathi we-Covid 19. Ilizwe lavalwa phantsi kothintelo kwintshukumo neendibano. Izithintelo kwiintshukumo zichaphazele kakubi uqoqosho lwehlabathi kunye neenkqubo zolawulo, ngenxa yoko amanye amanyathelo avela kwezinye iikomishini akabanga nakuphunyezwa. Nakubeni kunjalo, kukho izinto ezincumisayo ngaphandle kwemicelimingeni yenkqubela phambili ebangelwe ngubhubhani we-Covid 19.

Ngethamsanqa, unyaka ka-2018/19 ibe ngunyaka isebe lezolimo (DALRRD) eliye lazisa ngawp inkqubo yeNkxaso yoPhuhliso loMhlaba (LDS) emva kokuba inkqubo yokuThengiswa ngoKutsha noPhuhliso (RECAP) yayekwa kunyaka ka-2017/18. Ukwaziswa kwe-LDS kuye kwangqamana neminye imixholo exoxwe kwiikomishini ngexesha lenkomfa kuquka nophuculo kwinkalo yoncedo lwemali lisebe. Nangexesha lobhubhani wehlabathi we-Covid-19, i-SAFDA iye yakwazi ukungenisa izicwangciso zoshishino ze-LDS ukuze incedise kwiiprojekthi ezimbini zoLuntu iBambanani Mlambo Trust kunye ne-Matsamo CPA ezithe zaneziphumo ezincumisayo. Isicwangciso soshishino se-BMT siye samkelwa ngaphambi

kokuqala kwe-Covid-19 saze saphunyezwa ngempumelelo ngexesha le-Covid 19 ngoxa iMatsamo CPA nayo yahlaziywa yaze yangeniswa ngexesha le-Covid 19 kwaye yafumana imvume emva nje kwe-Covid 19. Inkqubo ye-LDS inikezelwa kuphela kwiiprojekthi ezilawulwa ngabahlali kangange-100 leepesenti kwaye oko kukhuthaza ukuzilawula kweefama (uluntu ngoku bayayeka ukwenza intsebenziswano engeyonzuzo eluntwini).

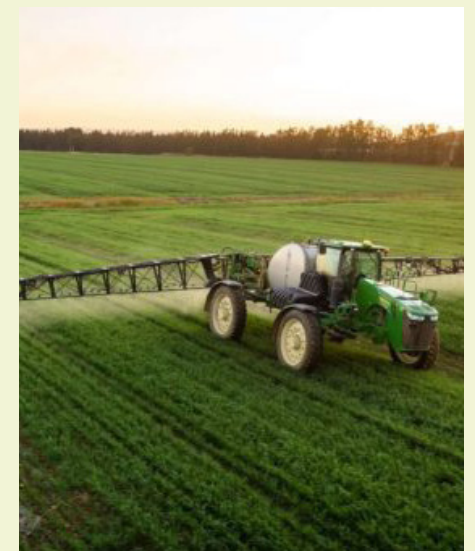

Inkqubo yokwabiwa komhlaba yaphinda yamiswa ngubhubhani wehlabathi we-Covid-19, kodwa siye sabona udluliselo oluyimpumelelo olwenzekayo kwiiprojekthi ezintathu zokubuyiselwa komhlaba eNkomazi. Uninzi lwamanyathelo ekomishini ye-SAFDA kwinkomfa yokuBuyiselwa koMhlaba yeIndaba nawo aye amiswa kodwa kukho izinto ezincumisayo eziquka iinkqubo zokuphunyezwa kwezicwangciso zoShishino lwe-LDS, iiworkshop zokuxhobisa ubuNkokheli beeProjekthi zoBuyiselwa koMhlaba kunye noqeqesho kuLawulo lweMali noLawulo oluye lwalandela kungekudala kwinkomfa ka-2019.

IBambanani Mlambo Trust kunye neMatsamo CPA isezezona projekthi zenza inkqubela ebonakalayo ekuzameni ukuphumeza izisombululo zenkomfa. Iiprojekthi ngoku zizilawula ngokwazo iifama ezisanda kudluliselwa. Sikwabona ukuthatha inxaxheba kwikhonkco lexabiso kwiikontraka zoluntu kwezinye zeeprojekthi zoluntu. Indlela ekuyilwe ngayo abaphathi abaphezulu kwezinye zezi projekthi nako kuphindwe kwajongwa kwaze kwahlaziywa ingakumbi kwiiprojekthi ezinemiba embalwa.

I-SAFDA inikwe ithuba lokuncedisa kwiiprojekthi ezininzi zokubuyiselwa komhlaba kunyaka-mali ka-2023/24 phantsi kwenkqubo ye-LDS. Umsebenzi we-SAFDA

uyakhula ngaphaya kweshishini leswekile ngeeprojekthi ezintsha zemveliso ezininzi ezincediswa yi-SAFDA ukusuka eBarberton phantsi koMasipala waseMjindini. Iiprojekthi ezimbini ezingakumbi zokubuyiselwa komhlaba zoMasipala waseNkomazi zikulungele ukuxhamla kwinkqubo ye-LDS kwakhona kulo nyaka-mali, uvavanyo lweefama, izicwangciso zoshishino kunye nezicwangciso zophuhliso loluntu zilungisiwe.

Ukuqokumbela, kukho ukusilela komsebenzi onxulumene namanyathelo ekuvunyelwene ngawo kwiikomishini ngexesha lenkomfa. Nangona kunjalo i-SAFDA ikwiphulo lokuvuselela umsebenzi wokubuyiselwa komhlaba kwakhona kumasimi alima iswekile eNkomazi. Njengendlela eya phambili kukho inkqubo ecetyiweyo yokuvuselelwa ngokutsha komhlaba ecetywayo apho zonke iikomishini kunye namanyathelo anxulumeneyo aya kujongwa kwakhona aze ahoywe kuba ngoku ezinye iiprojekthi ziye zahlengahlengiswa kwaye ngoku zisebenza ngemvisiswano kwakhona. Zonke izisombululo zenkomfa ziya kuhoywa ukuze kuphuculwe ukuzinza kweeprojekthi zokubuyiselwa komhlaba. I-SAFDA Mpumalanga isenomsebenzi omkhulu wokuphucula imbonakalo yokubuyiselwa komhlaba kulimo lweswekile eNkomazi.

IFUTHE LOKUNYUKA KWAMAXABISO AMAFUTHA KUMAFAMA

Ngexesha lokutyala ekuqaleni, amafama kuya kufuneka aginye ukonyuka kwamaxabiso amafutha nedizili. Ebudeni benyanga kaAgasti ukuya kuMatshi, abalimi bomoba basebenzisa eli xesha ukulungisa umhlaba nokutyala umoba. Le yinkonzo elungiselelwa ngoomatshini kusetyenziswa iikontraka zasekuhlaleni. Kukho inkxalabo malunga nendlela ukunyuka kwamafutha ekuza kubachaphazela ngayo abanye abantu abakwezolimo.

Amafama omoba athembele kakhulu kwiikontraka ekuvuneni, ukuthuthwa komoba usuka kumasimi ukuya kwindawo yokulayisha kusetyenziswa iitrektara ezineetreyla zeebhaskithi ezifikelela kwiitoni ezisi-8 ezilayishwa ngesilayishi somoba okanye itreyla yeetoni ezi-5 elayisha ngokwayo. Xa umoba usothulwa kwindawo yokulayisha emva koko uye ulayishwe kwilori ezitoni ezingama-28 ukuya kwezingama-34 ezithuthela umoba kwindawo yokusila iswekile. Ixabiso ledizili yeyona nto inegalelo kumaxabiso okulayisha ezithi iikontraka ziwabize amafama. Ngalo

lonke ixesha xa ixabiso lamafutha linyuka, iikontraka ngokuzenzekelayo zijonga uqikelelo lwazo zize ziwanyuse ukuze zihlale zishishina, ngaphandle kokuqwalasela ukuba abanye abalimi baza kuchaphazeleka njani kukutshintsha kwamaxabiso.

Kubalulekile ukujonga ukunyuka kwexabiso ledizili nelepetroli ngokudibene nokunyuka kwamaxabiso ezichumisi nemichiza. Ukunyuka kwamaxabiso epetroli kunciphise imidakangokuba amafama aye anciphisa okanye ayeka ukugawula isityalo sabo, nto leyo ekukugalelwa kwesichumiso nemichiza. Oku kukhokelela ekwehleni kweetoni ezihanjiswa kwiixesha lonyaka elilandelayo. I-tonnage ephantsi ikhokelela kwingeniso ephantsi, imajini ephantsi yengeniso. Ukuze aphile umfama kufuneka anciphise inani labasebenzi basefama okanye anciphise inani leeyure ezisetyenzwayo ngosuku. Umngcipheko owongeziweyo kukuba amafama kufuneka enze uhlahlo lwabiwo-mali lwawo kwangaphambili, ukuba sibona ukunyuka kwamaxabiso amafutha kunye neendleko
